

# Key Definitions

Choose from the following example definitions

<b>Definition 1</b>	“Ice cream is a frozen dairy food made by freezing a pasteurized mix with agitation to incorporate air and to ensure uniformity of consistency.” (Arbuckle, 2013)
<b>Definition 2</b>	“Ice cream...is a frozen mixture of a combination of components of milk, sweeteners, stabilizers, stabilizers, emulsifiers, and flavoring.” (Marshall et al., 2003)
<b>Definition 3</b>	“The term “ice cream” in its generic sense includes all whipped dairy products that are manufactured by freezing and are consumed in the frozen state, including ice cream that contains either dairy or non-dairy fats, premium (higher-fat) versions, “light” (lower-fat) versions, ice milk, sherbet and frozen yogurt” (Goff, 2006). In many legal jurisdictions, ice cream must have a minimum fat content of 10%.

So, we have the definition we want;  
what now?

# Paraphrase it!

Write your own definition by paraphrasing the one you've determined to be the most suitable for our example essay.
